

THE HOAX

The hoax is made of very glaringly obvious lies which should be visible to everyone.

Ever since the pandemic was declared, we have been fed a pack of lies. Every step of the way, we've been played like a fiddle.

In the very beginning, we were told some outrageous numbers of cases, deaths, and equipment needed. These numbers were all proved wrong.

All along the way, we have been fed things that were **WRONG, NOT CREDIBLE, BOGUS, ABSURD, FARCE... ALL LIES.**

We are now faced with the **MOST EGREGIOUS LIE OF ALL... ANYONE WHO TESTS POSITIVE FROM THE RT-PCR TEST IS INFECTED WITH THE COVID-19 VIRUS!**

This is a lie because the RT-PCR Test could not isolate the COVID19 virus. Although COVID-19 could not be isolated, the test was declared a success by detecting genetic material believed linked to COVID-19.

This genetic material is specifically Ribonucleic Acid (RNA). This is a universally accepted fact. I think you could say it is irrefutable. The test's ability to detect RNA is not in dispute. What is in dispute is the meaning of the RNA presence.

THIS RNA PRESENCE SIMPLY MEANS NORMAL GENETIC MATERIAL HAS BEEN DETECTED. IT IS PRESENT IN LARGE NUMBERS OF PEOPLE WHETHER OR NOT THEY ARE INFECTED WITH ANY VIRUS.

- Large numbers of positive test results are assured because of the ever-present RNA.
- RNA presence is being declared COVID-19 even though no infection has been detected.
- RNA presence is being declared COVID-19 even though a known respiratory condition exists.
- RNA presence is being declared COVID-19 even though a known non-respiratory condition exists.
- Illnesses that would normally be identified as something else are now declared COVID-19.
- COVID-19 cases are being declared even though the COVID-19 virus could not be isolated.

You don't have to be an expert to understand the ever-present RNA has been around long before the COVID-19 pandemic was declared, and it will be around for a long time to come. As the lies unfolded, they have been documented in the Pandemic Facts that follow.

PANDEMIC FACTS

Fact #1 - A Pandemic was declared by the World Health Organization (WHO) in mid-March 2020. It was based on predictions of extremely high infection and death rates resulting from a highly contagious virus.

- **WHO** – The World Health Organization (WHO) declared this pandemic.
- **WHAT** – This highly contagious virus was initially called novel coronavirus, later called coronavirus or COVID-19.
- **WHEN** – The first case dates back to the later part of 2019.
- **WHERE** – Cases originated in Wuhan, China

Fact #2 - Testing for novel coronavirus was inconclusive in the early stages supposedly because the virus had mutated. Until a more conclusive lab test could be developed, the accepted test was to compare a person's symptoms to a list of symptoms deemed to be those of novel coronavirus. If a person had those symptoms, that person was presumed to have novel coronavirus. We'll call this Presumptive Test #1. Later additional symptoms were added to the list. We'll call this Presumptive Test #2. Ultimately the RT-PCR lab test was developed. We'll call this Test #3. Anyone who tested positive from this test was deemed to have what then became known as coronavirus or COVID-19. Even though this test could not isolate the COVID-19 virus, the test was declared a success by detecting genetic material believed linked to COVID-19.

- Presumptive Test #1 was **BOGUS** because it was based solely on symptoms that could have been caused by a multitude of other things. What a joke!
- Presumptive Test #2 was even more **ABSURD** than #1 because an even larger number of symptoms was considered.
- Test #3 was a **FARCE** because a positive result indicated genetic material that is normally present in people with or without any illness. This test could not isolate the COVID-19 virus.

Fact #3 – The Numbers are revealing.

- Look at the number of additional beds requested for the NYC area. Thousands were set up at the Javits Center and on the Comfort hospital ship. Fortunately those beds were not needed. The number of **beds** requested was **WRONG**.
- Look at number of ventilators requested. Thousands were requested only to later find out they were not needed. The number of **ventilators** requested was **WRONG**.
- Look at reported numbers of overflowing Emergency Rooms. Long lines were reported at several different hospitals. Only days later at these same hospitals, no lines were found and the Emergency Rooms were empty. Those earlier news reports could not be substantiated. The numbers of overflowing **Emergency Rooms** were **NOT CREDIBLE**.
- Look at reported numbers of overflowing hospitals. Those reports could not be substantiated. In fact, those affected hospitals couldn't fill the beds they did have. A number of hospitals even reduced staff because of empty beds. The numbers of overflowing **hospitals** were **NOT CREDIBLE**.
- Look at number of COVID-19 cases determined from Presumptive Tests #1 and #2. A case is presumed COVID-19 when case symptoms match a list of symptoms. To be absolutely clear, these numbers represent not only cases that match the lists of COVID-19 symptoms, they also represent cases that match symptoms which fit a large number of other conditions. It's not possible to have any confidence that these numbers represent only COVID-19 cases. The **Presumptive Test** numbers are **NOT CREDIBLE**.
- Look at number of COVID-19 cases determined from Test #3. This test is specifically the RT-PCR lab test. It's important to understand that this test is a farce because it is not able to isolate the COVID-19 virus. It is only able to detect genetic material believed linked to COVID-19. But, this genetic material is present in large numbers of people whether or not they are infected with any virus. In other words, detecting a whole family of ever-present genetic material makes the **Test #3** numbers artificially high and **NOT CREDIBLE**.
- Look at number of deaths attributed to COVID-19. These numbers are derived from artificially high and not credible COVID-19 case numbers. In addition, these numbers are further bastardized by reporting COVID-19 deaths to include deaths following a COVID-19 positive test even if the actual death was from other underlying causes. These **death numbers** are **NOT CREDIBLE**.
- Look at the **fatality rate** information that follows. "It is asserted that the clinical consequences of this Covid 19 may ultimately be akin to that of a serious seasonal flu, according to the top US expert Dr. Fauci who said, in his March 20, 2020 professional article in the New England Medical Journal, that its fatality rate is only 0.1 percent, not 3.4 percent as what the WHO

said. For his part, Dr. Kaufman even asserts that the illness does not rise to the level of influenza, because its fatality rate is very much lower than that of influenza.” Source: <https://mindanaogoldstardaily.com/the-science-behind-covid-19/>

- Look at **actual reported death numbers** in the list below. Note, these numbers were collected prior to being largely affected by the RT-PCR test.

- Look at more **actual reported death numbers**.

**EIGHTEEN
COUNTY
CORONERS IN
PENNSYLVANIA
CAME OUT TO
TELL WOLF HIS
COVID DEATHS
ARE MADE UP.
#lookitup**

- **Real reported death numbers DO NOT INDICATE A PANDEMIC.**

Fact #4 – The RT-PCR test is used to check for the presence of the COVID-19 virus. Anyone who tests positive from this test is determined to be infected by the virus. Although the test could not isolate the COVID-19 virus, it was declared a success by detecting genetic material believed linked to COVID-19.

This genetic material, specifically Ribonucleic Acid (RNA), is normally present in large numbers of people whether or not they are infected with a virus. Some have no symptoms because there is nothing wrong with them. Others may have a viral infection including ever-present coronaviruses.

“Coronaviruses make up a large family of viruses that can infect birds and mammals, including humans, according to the World Health Organization (WHO).”
Source: www.livescience.com

This ever-present RNA has been around long before the COVID-19 pandemic was declared, and it will be around for a long time to come. Detecting RNA and calling it COVID-19 is a **FARCE!** In other words, this test produces **COVID-19 CASE NUMBERS THAT ARE NOT CREDIBLE.**

This test is the **MOST EGREGIOUS LIE OF ALL... NO TESTS CAN PROVE THAT COVID-19 EVEN EXISTS.**

ONLY AFTER THIS TEST WAS ACCEPTED DID THE CASE AND DEATH NUMBERS DRAMATICALLY RISE!

Fact #5 – Treatments evolved over the course of the pandemic. One early treatment was Hydroxychloroquine. As testing went on, Hydroxychloroquine in combination with Azithromycin and Zinc proved to be very effective. A number of tests were done on hundreds of patients in each test with 100% recovery. The CDC refuted those claims pointing to a VA study. But, that study was conducted on veterans in their "last stages" of their infection. Not a valid comparison! Even those who support Remdesivir acknowledge that the recovery rate is only about 31% for that drug. That support certainly raises the question (Why?) especially when the cost for current patent Remdesivir is extremely high when compared to the cost for expired patent Hydroxychloroquine. Remember, it is the viral pneumonia complication that is life-threatening with this virus. The treating physician should remain focused on what works best for viral pneumonia.

- The Hydroxychloroquine **100%** recovery rate was reported by at least two tests of over 500 persons each.
- The CDC **REJECTION** of Hydroxychloroquine is baseless.
- The Remdesivir **31%** recovery rate should not be acceptable when Hydroxychloroquine is a better alternative.

Fact #6 – The COVID-19 Future relies heavily on results of the RT-PCR lab test. Large numbers of positive results are assured by an ever-present family of genetic material. As the stay-at-home orders are lifted, the case numbers will most likely increase simply because more people are circulating. Here's how it plays out.

- **LARGE NUMBERS OF POSITIVE TEST RESULTS** are assured by an ever-present family of genetic material.
- **CASE NUMBERS WILL INCREASE** after stay-at-home orders are lifted because more people are circulating.
- **RECOVERY** will be **STYMIED** by the CDC's rejection of Hydroxychloroquine.
- **DEATH NUMBERS** will remain **PLENTIFUL** for all the reasons previously mentioned.

CONCLUSIONS

- **THIS PANDEMIC HAS BEEN PLANNED FROM DAY-ONE.**
- This pandemic was declared under **FALSE** pretenses.
- This pandemic is being perpetrated with the **FALSE** and **NOT CREDIBLE** information as described on this website.
- This pandemic is nothing but **LIES**.
- **THE MOST EGREGIOUS LIE IS OF ALL IS THE INTERPRETATION OF THE RT-PCR TEST RESULTS.**
- This test assures that **NUMBERS RISE TO A PANDEMIC LEVEL.**
- This test assures **LARGE NUMBERS TODAY.**
- This test assures **LARGE NUMBERS WELL INTO THE FUTURE.**
- This test assures **LARGE NUMBERS WILL PRODUCE THE PANDEMIC'S SELF-FULLFILLING PROPHECY.**
- **THIS PANDEMIC IS A PREPOSTEROUS CONCOCTION OF FABRICATED EVENTS CULMINATING WITH A TEST THAT ENSURES LARGE NUMBERS OF POSITIVE RESULTS.**

ABOUT THE AUTHOR

When the pandemic was declared, I immediately began to analyze what was going on. Things just didn't add up. I found lie upon lie. I spent endless hours searching for the truth. During that search, I came across a 4/20/10 interview that Clyde Lewis had with David Icke. That interview opened the door for me to see the hoax (scam as he calls it). That hoax along with the other lies are presented herein.

I am a private citizen living in the NY, NJ, PA tri-state area. I have been able to personally see or know others who have first-hand knowledge of what's going on. I watched the PA, NJ, and NY Governors put sick people in long-range care facilities. I saw staged lines at NYC and Hawaii hospitals. I saw lies on top of lies! The culmination of all these lies was the most egregious lie of all... the COVID-19 TEST.

I find it inconceivable how the whole world can be devastated by a whole pack of lies.

END THE PANDEMIC
